

The Flat Round

TFR-330-DW-24V

The Flat Round by VOLTRON® is a round dimmable LED-downlighter for installation in false ceilings with ultra thin and light housing (only 26mm high!). ALU housing with lateral cooling fins for optimal cooling and long lifespan of the light output. The fixation in the ceiling is done with high-quality springs with extra protective rubbers. Electric connection is done with DC male/female connectors for very fast installation. The diffuse PC light surface ensures a smooth light distribution. This downlighter is also perfect suitable as a wall or floor lighting. TYPE TFR-330-DW : Ø330mm - 34W - 3177Lm - 4000K - IP52 class - MacAdam 3 - white - HEIGHT = 26mm (!) - L80 >54.000h. Connectable to Meanwell power supplies (IP67) with constant voltage (not included). Warranty = 5 years.

Specification text*

Highly efficient round dimmable LED downlight for installation in false ceilings with an ultra thin and light housing. White aluminum visible outer housing with cooling fin structure for optimum long-term operation. At the rear with removable high-quality ALU plate to promote the firmness and accelerated cooling of the LEDs. Fixation in the ceiling is done with 4 spring clips with plastic covered against incision. Electric connection using DC male / female connectors for very fast assembly. The panel has 168 LEDs type Epistar SMD2835. Light control via opaque opal optic from PC for glare protection and maximum luminaire efficiency. Panel can also serve as wall or floor lighting. Dimensions outsideØ = 330mm, thickness 26mm and a weight of barely 995gr. Generates 34W and 3100lm at 24V and a light color 2700K (white). IP52 class. IK 03, MacAdam 3, L80 >54.000, UGR <19. Extremely suitable for office spaces, meeting rooms, showrooms, shops, corridors, toilets and classrooms. Can be connected to Meanwell power supplies (IP67) with a constant voltage. With a color rendering index of > 85. Equipped with photo metric report and IES file for elaboration in DIALux.
